

GENERATION D LIFT TRUCKS

Built for your
world. Built for
more.

Maximum performance. Minimum complexity.

Konecranes Generation D lift trucks pair proven capabilities with brilliantly simple design to deliver industry-leading uptime and outstanding reliability. The modular platform and intuitive interface eliminate operational hurdles at every level – so you can simply focus on your business.

-  **Built to evolve**
Choose the exact configuration your business needs today and evolve it for tomorrow.
-  **Predictable maintenance**
Equip your technicians for a first-time fix and resolve breakdowns faster through actionable insights.
-  **Continous adaptation**
Easily deploy over-the-air software updates and new features through an open digital architecture.
-  **Security by design**
Built-in cybersecurity actively protecting your business.
-  **Fully connected fleet**
Connect machines directly to your TOS and apps through “Plug and Play” data integration.
-  **Effortless operation**
Familiar ergonomic controls, outstanding visibility, and a brilliantly simple interface that helps drivers focus on the work.

We believe smarter technology is about enhanced performance, increased productivity and reduced complexity. As regulations change and technology accelerates, you need machines that are safer, easier to operate, and more reliable – so they keep delivering for you day after day.

With the all-new Generation D, we deliver superior performance and reliability through brilliantly simple design. We maximize your uptime, make it easier to manage your fleet, streamline asset maintenance, and provide a safer environment for your drivers.

The first models introduced under Generation D are new diesel and electric Konecranes reach stackers. Expansion across the full portfolio continues.

Superior performance and reliability through brilliantly simple design.

A unified range of lift trucks that integrates with your world and evolves with your business.

Generation D delivers the smartest, safest seat in the house for your drivers and predictable ease for your mechanics, transforming your equipment into a long-term financial asset that offers genuine return on investment through increased uptime, greater productivity, and continuous evolution.

**UNCOMPROMISING UPTIME.
UNSTOPPABLE FLOW.**
For 24/7 operations where throughput is everything, Generation D brings increased certainty to your fleet, combining proven durability with seamless data integration.

**DESIGN THAT PROMOTES
PROFITABILITY.**
When maximizing your equipment’s lifecycle value is the top priority, Generation D brings a compelling Total Cost of Ownership advantage.

**THE SMARTEST, SAFEST SEAT IN
THE HOUSE.**
Generation D delivers ‘The ultimate workplace,’ pairing the outstanding visibility and ergonomics you trust with an intuitive new digital interface.

Diesel reach stackers

Managing a reach stacker has never been simpler.

With an intuitive user experience, the Generation D reach stacker delivers industry leading performance and efficiency through proven diesel power. By pairing this raw capability with brilliantly simple design, it eliminates operational friction. The result is outstanding productivity, reliable uptime, and quicker troubleshooting – so you can stay focused on your business.

UNCOMPROMISING UPTIME. UNSTOPPABLE FLOW.

A brilliantly simple interface puts the essentials in clear view for drivers and mechanics, helping them work faster and avoid wasted time. Rapid remote diagnostics speed up troubleshooting when issues occur, while over-the-air (OTA) updates help keep your equipment improving over time – protecting uptime and operational certainty.

A SMART INVESTMENT YOU CAN RELY ON.

A wide range of configurations lets you match the machine to your exact needs. Proven diesel performance delivers reliable uptime and strong productivity, while the trusted cabin and brilliantly simple new digital interface mean drivers and mechanics only need to learn one platform – reducing training time, minimizing errors, and lowering lifetime operating costs.

COMFORT AND CONTROL, SHIFT AFTER SHIFT.

The ultimate working environment, helping drivers stay comfortable, safe and focused, shift after shift. The trusted cabin and familiar ergonomic controls reduce physical strain and cognitive fatigue, while superior visibility and the intuitive new interface keep core operational data clear at a glance without sacrificing situational awareness.

What's more

Your machine is built to adapt, giving you the flexibility to integrate new driver assistance features and safety upgrades as your requirements change.

SMART LOAD-SENSING HYDRAULICS

Specially designed hydraulics sense the weight of the load and adapt lifting power accordingly. The truck provides maximum power only when really needed, so it consumes less fuel while reducing emissions and noise.

OPTIMA CABIN

This ultimate working environment provides ergonomic controls, reduces physical strain and cognitive fatigue. An intuitive interface and superior visibility help drivers easily maintain complete situational awareness.

REMOTE UPDATES

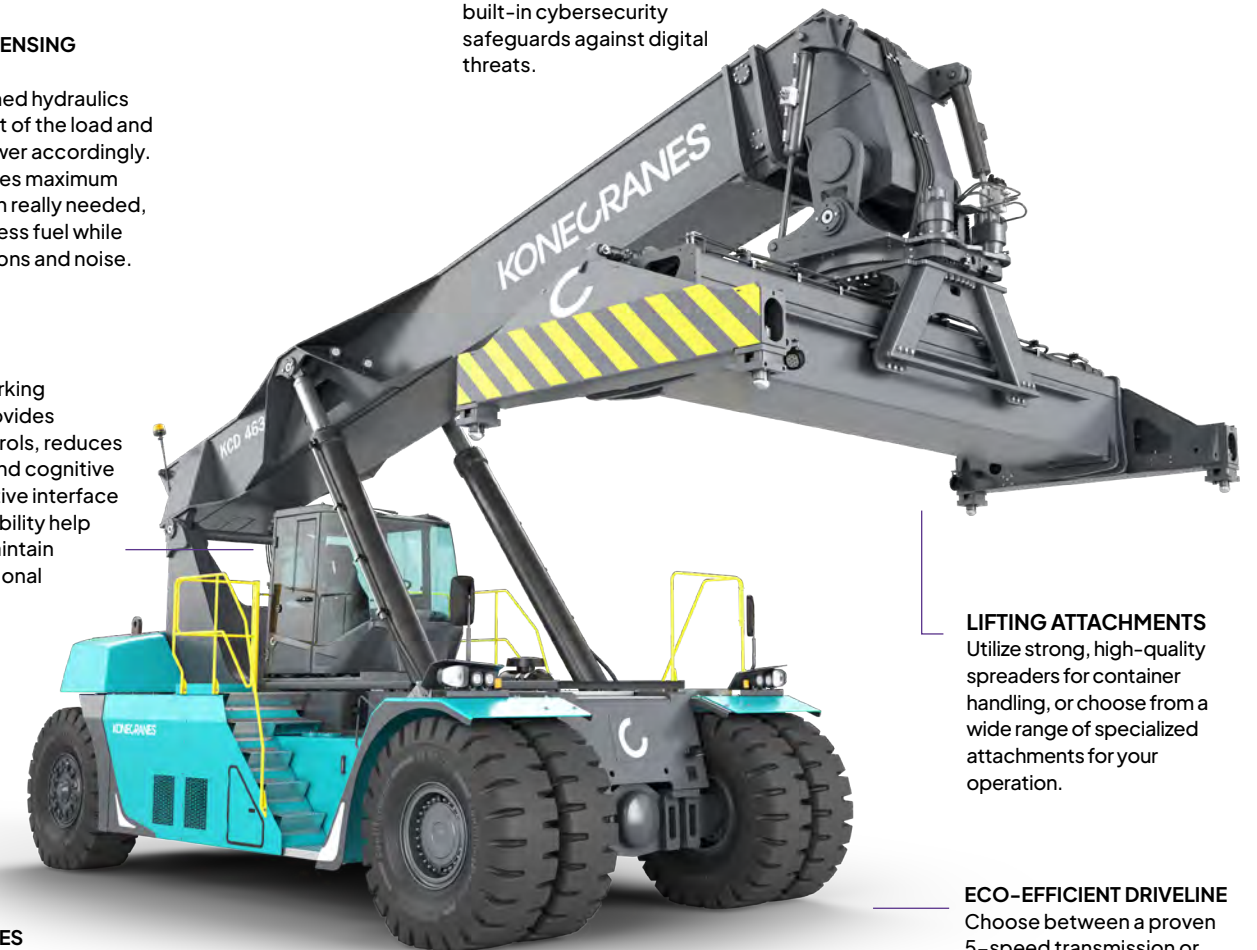

Enabling continuous adaptation through an open digital architecture that supports remote over-the-air (OTA) updates – allowing you to easily deploy software updates or add new features when requirements change.

SAFETY AND COMFORT

The superior cabin design with outstanding visibility actively reduces driver cognitive fatigue and physical strain, making it easier to stay observant through a long shift. Easily integrate new driver assistance features while built-in cybersecurity safeguards against digital threats.

NEW INTUITIVE INTERFACE

A larger screen with a brilliantly simple to use interface, reducing cognitive fatigue and helping drivers focus on their work.

LIFTING ATTACHMENTS

Utilize strong, high-quality spreaders for container handling, or choose from a wide range of specialized attachments for your operation.

ECO-EFFICIENT DRIVELINE

Choose between a proven 5-speed transmission or the stepless Flow Drive HVT, paired with a low-emission engine delivering high torque at low revs for reduced fuel consumption – with HVO100 biofuel compatibility further minimizing tailpipe emissions.

FIRST-TIME FIX

Equipping your technicians for a first-time fix through actionable insights that make maintenance highly predictable while enabling them to resolve unexpected breakdowns faster.

Available models

Generation D is available across a range of proven models and capacities (42 to 46 tons) you know from Generation C—now delivered on a next-generation platform, in both electric and diesel variants. As the range continues to expand, additional models and configurations will follow.

Tell us the lifting capacity and attachment configuration that best suit your operation, and we'll deliver the perfect fit for your world.

Electric reach stackers

Managing a reach stacker has never been simpler.

With Generation D electric reach stackers, you get:

- More power and efficiency than traditional diesel machines with zero tailpipe emissions.
- Reduced operational friction by pairing powerful performance with an intuitive user experience .
- Outstanding productivity, reliable uptime, and effortless maintenance, so you can stay focused on your business.

What’s more

Your machine is built to adapt, giving you the flexibility to integrate new driver assistance features and safety upgrades as your requirements change.

UNSTOPPABLE FLOW THROUGH SMART POWER.

By offering multiple different battery sizes and multiple DC-fast charging options, your drivers can simply fast-charge during existing shift breaks, easily sustaining intense operations without throughput penalties. Plus, with rapid remote diagnostics and simple over-the-air (OTA) update capabilities, your machine continuously evolves while maximizing your operational certainty.

THE TCO CHAMPION.

With multiple different battery sizes and a wide range of options, you can tailor the machine to match your shift patterns and exact needs. Once operational, the highly efficient electric powertrain doesn’t compromise on performance, delivering the raw productivity of a diesel giant while drastically reducing your energy and maintenance bills.

THE EVOLVING SAFE WORKPLACE.

It utilizes a smooth electric drive that reduces the noise, vibration, and stressful breakdowns that cause driver fatigue. Combining superior visibility with the new intuitive interface gives drivers a clear, easy view of their core operational data while maintaining complete situational awareness.

OUTSTANDING PRODUCTIVITY

Fast-charging during scheduled breaks guarantees continuous movement without disruptive throughput penalties for 24/7 operation. You can also achieve a full charge in 1 to 3 hours to sustain unstoppable flow.

OPTIMA CABIN

This ultimate working environment provides ergonomic controls, and reduces noise and vibrations to prevent fatigue. An intuitive interface and superior visibility help drivers easily maintain complete situational awareness.

CUSTOMIZED CHARGING SETUP

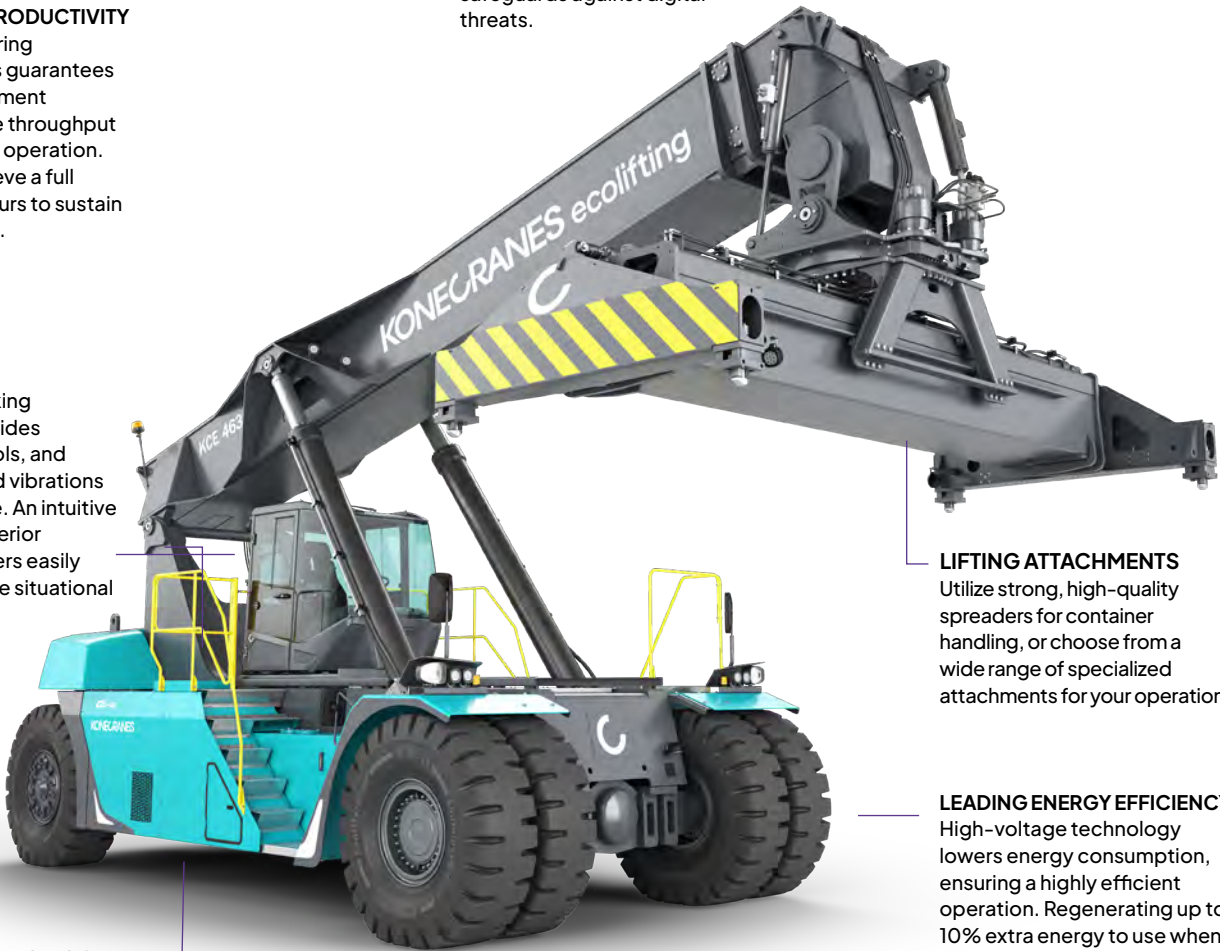

Tailor the machine exactly to your shift patterns with various high-energy battery packages. Multiple DC-fast charging options feature versatile GB/T or CCS single and dual ports.

SAFETY AND COMFORT

The superior cabin design with outstanding visibility reduces driver physical strain and cognitive fatigue, making it easier to stay observant through a long shift. Easily integrate new driver assistance features while built-in cybersecurity safeguards against digital threats.

FASTER HANDLING

Engineered for continuous movement, the strong motors deliver faster acceleration and significantly higher handling speeds than diesel. Highly efficient load-sensing hydraulics direct this extra electric power exactly where needed most.

LIFTING ATTACHMENTS

Utilize strong, high-quality spreaders for container handling, or choose from a wide range of specialized attachments for your operation.

LEADING ENERGY EFFICIENCY

High-voltage technology lowers energy consumption, ensuring a highly efficient operation. Regenerating up to 10% extra energy to use when needed the most through e-Braking or free rolling for “a diesel feeling”.

NEW INTUITIVE INTERFACE

A larger screen with a brilliantly simple to use interface, reducing cognitive fatigue and helping drivers focus on their work.

Available models

Generation D is available across a range of proven models and capacities (42 to 46 tons) you know from Generation C—now delivered on a next-generation platform, in both electric and diesel variants. As the range continues to expand, additional models and configurations will follow.

Tell us the lifting capacity and attachment configuration that best suit your operation, and we’ll deliver the perfect fit for your world.

Konecranes is a global leader in material handling solutions, serving a broad range of customers across multiple industries. We consistently set the industry benchmark, from everyday improvements to the breakthroughs at moments that matter most, because we know we can always find a safer, more productive and sustainable way. That's why, with around 16,500 professionals in over 50 countries, Konecranes is trusted every day to lift, handle and move what the world needs. In 2025, Group sales totalled EUR 4.2 billion. Konecranes shares are listed on Nasdaq Helsinki (symbol: KCR).
